Dear Joshua -

Sorry to learn that the Oginsky-Umbreit-Smith phenomenon is no longer a phenomenon. It was nice while it lasted. By all means send me any interesting-looking petites of E. coli that turn up, but not until I get to NY, as I'm working hard to get our mandelate problem finished before leaving here at the end of next week.

I'd hoped to get up to Madison once more, but am afraid it can't be worked, as time here is now so short. Future addresses will be:

Dept of Pharmacology, NYU, Dec. 15 -  
Feb. 15.

Protein Institute after Feb. 15.

Best wishes to you both,

Kogen
